Public Works & Utilities

Quarterly Update

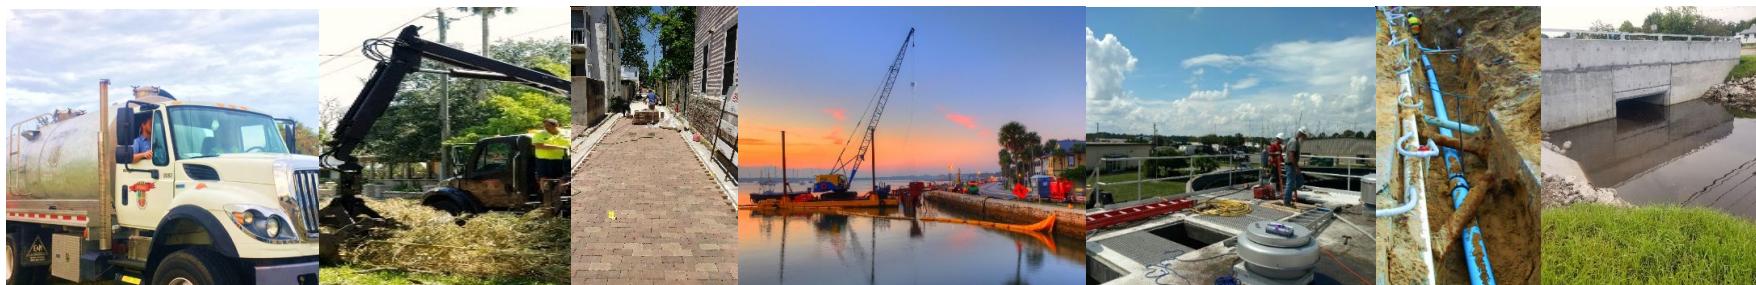

January 23, 2023

Todd J. Grant, P.G.

Director, Utilities

Reuben C. Franklin, Jr., P.E.

Director, Public Works

PW & Utilities Quarterly Update Agenda

- ❖ Resilience Program Updates
- ❖ FEMA 13 Lift Station Rehabilitation Project
- ❖ Wastewater Treatment Plant Rehabilitation
- ❖ West 3rd St Gravity Sewer and Water Main Improvements
- ❖ West Augustine Gravity Sewer Improvements
- ❖ Capital Projects Overview and Status
- ❖ Sustainability and Environmental Updates
- ❖ COSA/FPL Light Conversion Updates
- ❖ Mobility Program Update
- ❖ Questions and Discussion
- ❖ Appendix – CIP Project Information Sheets & Glossary of Terms

Resilience Program Updates

❖ Overview of the Resilience Program and Strategy

Resilience Program Updates

❖ Planning

➤ Updated Vulnerability Assessment – City and County

- City awarded \$500,000 from FDEP Resilient Florida to complete an updated Vulnerability Assessment (VA)
- VA will meet the Resilient Florida Program requirements, making the City eligible for future funding/participation
- The City is coordinating with St. Johns County on this effort

➤ USACE Back Bay Feasibility Study

- Feasibility Cost Share Agreement – officially executed January 9, 2023, during the signing ceremony prior to the City Commission meeting
- 3-year, \$3 Million comprehensive study to evaluate coastal storm risks, depending on final geographical boundaries
- Identified solutions are eligible for Federal cost share funding for construction

Resilience Program Updates

❖ Programs

➤ Flood Mitigation Assistance (FMA)

- Over 80 properties interested in the program, 62 properties had complete applications that met the program requirements
- City submitted its applications to the State November 14th and is currently under State review
- Total funding request of \$12,353,474 submitted that would be cost shared with FEMA if selected
- The applications must go through the State review process, eligible applications will then be submitted to FEMA
- Late August – estimated timeframe to know if selected

Resilience Program Updates

❖ Projects

- ✓ FEMA 13 Lift Stations Rehabilitation – see separate slides for update (www.CityStAug.com/FEMA13)
- ✓ Lake Maria Sanchez Flood Mitigation and Drainage Improvement Project (Resilient Florida) – proceeding with design (www.CityStAug.com/LakeMariaSanchez)
- ✓ Avenida Menendez Flood Barrier (HMGP) – Phase 1 @ 100% Design, awarded FIND funding (\$500,000), permitting completed
- ✓ South Whitney West King Street Flood Mitigation (HMGP) – design completed, working with St. Johns County

CITY OF
ST AUGUSTINETM

Resilience Program Updates

❖ **Current Flood Mitigation Investments ≈ (\$58,218,292, grant funded, 83%):**

- ❑ Lake Maria Sanchez*, **
- ❑ FEMA 13 Lift Station Hardening and Flood Proofing*
- ❑ Wastewater Treatment Plant (WWTP) Flood Proofing – (Complete)
- ❑ South Whitney/West King (SWWK) Flood Mitigation*, **
- ❑ Avenida Menendez Flood Wall*
- ❑ City-wide tide check valves (43 installed, 20 future)**
- ❑ Coquina Park – (Complete)
- ❑ South Dixie Highway Culvert Replacement** – (Complete)
- ❑ Lincolnville Utility and Drainage Improvements*, **
- ❑ South Davis Shores Flood Mitigation and Drainage Improvements *, **
- ❑ Inlet Drive Shoreline Resiliency Improvements *, **
- ❑ Flood Mitigation and Drainage Improvements for the Court Theophelia Neighborhood*
- ❑ Vulnerability Assessment Update**
- ❑ USACE Back Bay Feasibility Study *, **

*Denotes Federally Funded Project (FEMA –PA, HMGP; HUD/DEO-CDBG-NR)

**Denotes State Funded Project (SJRWMD, FDEP)

FEMA 13 Lift Stations Rehabilitation

- ❖ Construction Cost \$13.8M
- ❖ Start Construction Jan 2021
- ❖ Finish Construction Feb 2023
- ❖ Substantially Complete:
 - ❖ LS-4, 5, 6, 7, 11, 12, 21, 22, 23, 24, 52
 - ❖ Punch list items remain
- ❖ Under construction
 - ❖ 10, 50
- ❖ Arricola Ave. Force Main
 - ❖ Complete

CITY OF
ST AUGUSTINETM
EST. 1565

Wastewater Treatment Plant Headworks Rehabilitation

- ❖ **Construction Cost \$3.98 M**
- ❖ **Start Construction July 2022**
- ❖ **Finish Construction Aug 2023**

CITY OF

West 3rd Street Sewer Extension – Volusia to Knowlton St

West 3rd Street Sewer Extension

- ❖ Status: Bidding
- ❖ Approximately 26 homes to be connected
- ❖ Construction Time Frame: 6 Months
- ❖ Includes water main improvements

Funding Sources

- ❖ \$300,000 State Grant
- ❖ Portion of \$2,000,000 State Grant

CITY OF
ST AUGUSTINETM
EST. 1565

West Augustine Gravity Sewer Improvements

West Augustine Sewer Master Plan

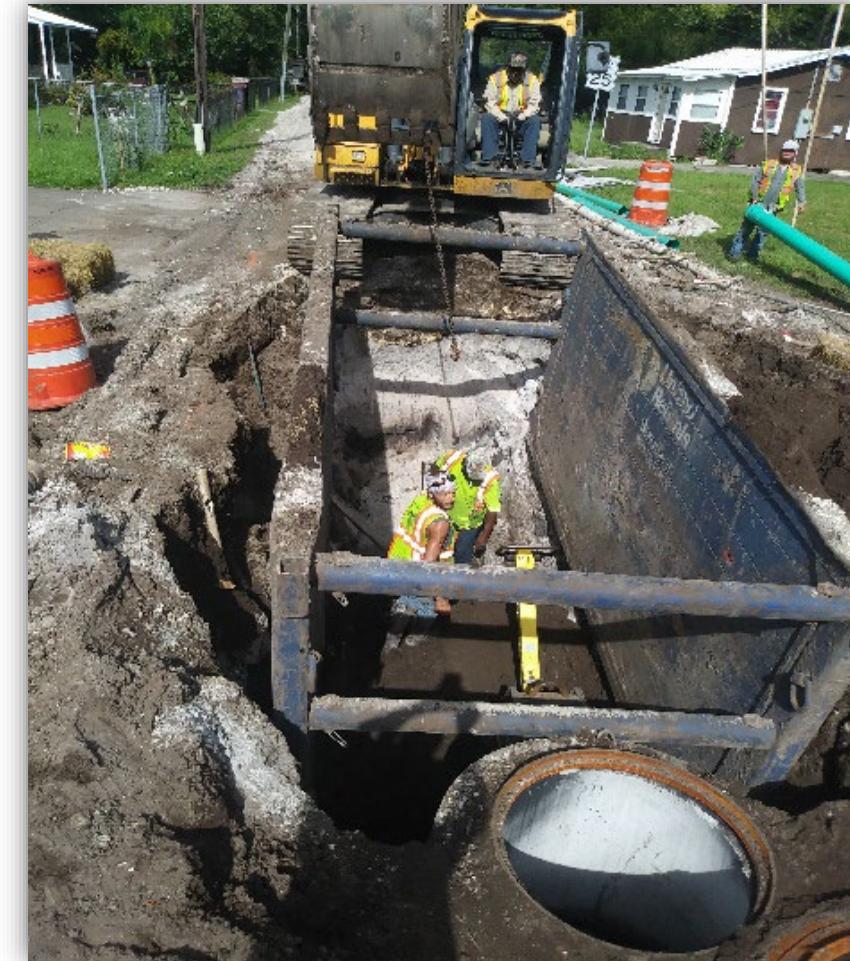

- ❖ In Design

Septic-to-Sewer Program

- ❖ Abandoned 57 septic systems to date

Pearl Street Gravity Sewer

- ❖ In Design - Expanding gravity sewer from existing lift station
- ❖ Water main improvements part of this project

Sustainability Updates

Recycling Events

- ❖ **Celebrating America Recycles Day – 11/18/2022**
 - ❖ Drop-off location at Solid Waste
 - ❖ 132 participants
 - ❖ 5,000 lbs of paper shredded
 - ❖ 6 pallets of electronics & batteries recycled
 - ❖ 2 gallons of used cooking oil recycled

- ❖ **Recycle Collection Event – 1/4/2023**
 - ❖ Drop-off location at Francis Field
 - ❖ 83 participants
 - ❖ 1 trailer load of electronics
 - ❖ 45 gallons of used cooking oil recycled

Glass recycling
coming soon!

Environmental Programs Updates

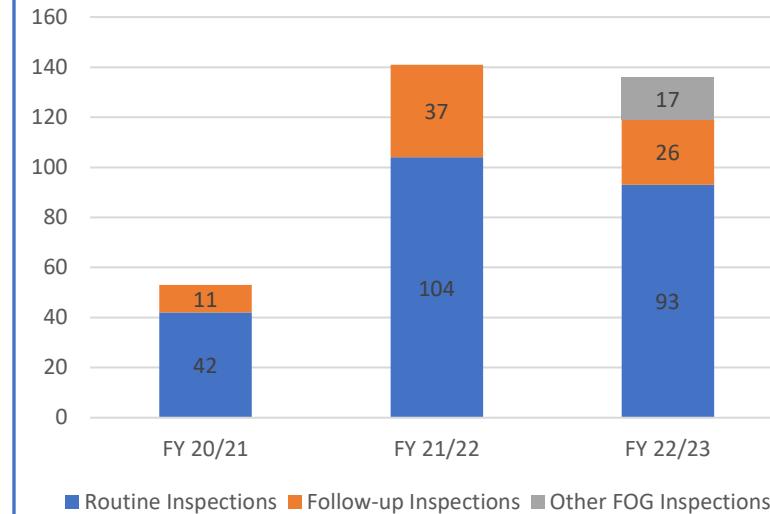

❖ Fats, Oils & Grease Program

- ❖ 136 inspections completed this quarter
- ❖ 26 facilities out of compliance & required follow-up inspections
- ❖ 17 other inspections included new grease trap installations and facility evaluations

❖ Illicit Discharge Detection & Elimination Program

- ❖ Monthly pollution prevention inspections completed at fleet & marina
- ❖ 93 proactive illicit discharge inspections
- ❖ Cityworks implementation for tracking NPDES permit requirements

Fats, Oils & Grease Program Inspections
Completed 1st Quarter (Oct - Dec)

❖ Cross-Connection Control Program

- ❖ 2,091 active accounts
- ❖ Received/logged more than 480 backflow preventer test reports

The logo for the City of St. Augustine. It features the words "CITY OF" in a small, red, sans-serif font above the word "ST. AUGUSTINE" in a large, bold, red, sans-serif font. Below "ST. AUGUSTINE" is a horizontal blue line. Underneath the blue line is the text "EST. 1565" in a smaller, black, sans-serif font.

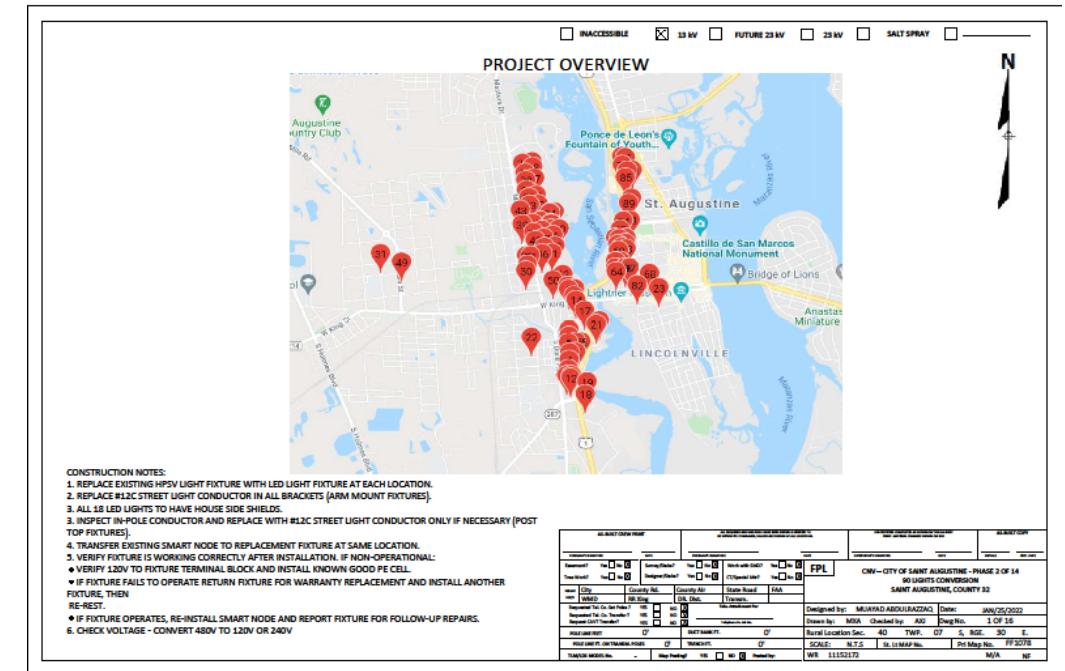

CoSA/FPL LED Light Conversion Program

❖ COSA / FPL LED Lighting Agreement

- ❖ Agreement signed on December 15, 2021
- ❖ Total of 1,354 Fixtures to be changed from HPS to LED
- ❖ Project was divided into 14 phases
- ❖ 100% Complete

	NAME	KELVIN	LUMEN

Anastasia Boulevard Fire Station and Traffic Improvements

The City intends to acquire 5-acres of vacant state land located at Anastasia Park. This land acquisition allows the City to construct a modern fire station in a new location to serve the surrounding area. It will also allow the existing fire station located near the state park entrance to be decommissioned. The City will then work with the FDOT to make intersection improvements at Anastasia Boulevard, Red Cox Road, and Old Quarry Road for safety improvements.

Army Corps of Engineers Back Bay Feasibility Study

The City of St. Augustine Coastal Storm Risk Management (CSRM) Study is a three-year federal feasibility study that investigates coastal storm impacts on the City of St. Augustine. In partnership with the Army Corps of Engineers, City of St. Augustine and its stakeholders, the study will also explore economically-viable and environmentally-sound solutions to mitigate coastal storm risks. The objective of the Study is to investigate Coastal Storm Risk Management problems and identify solutions to reduce damages from coastal flooding that affects population, critical infrastructure, historic and culturally significant resources, and ecosystems, which will benefit the community as future projects are designed to mitigate flooding. Resilient Florida program is granting \$500,000 to this study. US Army Corp will cover 50% of the \$3 million.

Arricola Ave Force Main HDD

This project will replace and extend the force main between LS-51 and 52 in South Davis Shores. The existing cast iron force main stops short of LS-52 and discharges into a manhole on Solano Ave. This has caused SSOs (sanitary sewer overflows) at the manhole on Solano. This project will improve our utility, harden the collection and transfer of wastewater, and eliminate SSOs. Design and construction of this project is funded by city bond proceeds.

CITY OF ST. AUGUSTINE
FEMA 13 Lift Stations Rehabilitation and Arricola Avenue Force Main

Arricola Force Main UPCOMING WORK

SUMMARY

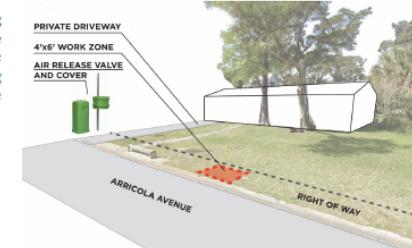

In 2016 Hurricane Matthew storm surge damaged 13 lift stations. After repairing them, the City began investigating upgrading them given the threat of future storm events. The lift station improvements will include a proactive approach to future storm damage. The City will elevate the electrical control panels to account for 500-year flood events and storm surge, and the City will upgrade the wet wells' concrete ballast to resist buoyant forces. **The City is combining the necessary repairs of the lift stations with a new wastewater force main underneath Arricola Avenue.**

IMPACT IN YOUR YARD

Work will be occurring within the public right of way, but the City, contractor, and design team understand many yards do extend from private to public property. The contractors have been instructed to restore any sod or mulch areas to match the surrounding sod / mulch type.

A small number of yards will be impacted with the addition of air release valves and enclosures. This is a critical piece of infrastructure that keeps the force main working correctly. These have been carefully planned around the series of driveways and landscape areas, and continued coordination will continue in the field during construction.

Driveways may be impacted during some times due to laydown of pipe and general coordination. The contractor team is committed to providing access / coordination as much as possible during construction.

WORK TIMELINE

START OF CONSTRUCTION	Approximately March 14, 2022
END OF CONSTRUCTION	May 2022

Avenida Menendez Seawall

The City of St. Augustine has received federal funding through FEMA's Hazard Mitigation Grant Program to design and construct the final segment of seawall near the Marina. This project will essentially close the "elevation" gap between the existing north (Bayfront Park) and south (2013 Avenida Menendez Seawall) segments. The project entails raising the final segment of seawall to match the north and south elevations, installation of two (2) tide check valves, and rehabilitation of the existing seawall to harden it. The combination of this work will provide for a higher level of flood protection up to the 100-year storm event (also referred to as the 1% annual chance event). The City has also recently applied to the Florida Inland Navigation District (FIND) to help with the construction costs that the City will be responsible for. Decisions on the pending grant application with FIND will be made later this summer or early fall.

Court Theophelia Neighborhood Stormwater and Utility Improvements

The project includes design, permitting, and construction to replace aged utilities, upgrade existing storm water infrastructure and evaluate structural and non-structural based resiliency options for the neighborhood. A mobility component will also be included. The project outcomes include reconstruction of flood prone and damaged roads due to high tide flooding, improved drainage to provide a higher level of service during rainfall events, replacement of aged utilities, implementation of green infrastructure and/or low impact development to provide water quality benefit with storm water management, potential incorporation of greenspace for multi-project benefits to serve as recreational, storm water mobility and resiliency uses. Resilient Florida program is granting \$ 2,581,600 to this project.

Downtown Circulator – Route 1

This project will operate a bus circulator throughout the city. Beginning in the red brick cul-de-sac at the City of St. Augustine (CoSA) Visitor Information Center (VIC) located at 10 South Castillo Drive, the Circulator will travel south to the intersection of Cordova Street at Orange Street. Then turn left and travel east along Orange Street to South Castillo Drive. Then turn right onto South Castillo Drive and travel in a southeasterly direction to Avenida Menendez and turn right onto Avenida Menendez. Then right on Cathedral Place and right onto Cordova Street heading north back to the VIC. The total travel distance is 1.12 miles, and travel time is estimated to be 15 minutes during normal traffic conditions and should include normal required time for passengers unloading/loading at the 3 Stops. Frequency of Stops are desired to be in 15-minute intervals. FDOT is providing \$1.0 million operational funding for five years.

Groundwater Monitoring

This project will focus on predicting impacts, specifically to critical infrastructure, of sea level rise by installing a monitoring network to accurately measure rates of change in current shallow groundwater elevation and water quality. The monitoring network proposed will contain up to 60 monitoring points. A professional licensed surveyor will survey each point. Monitoring will be scheduled/sequenced to represent the same atmospheric / geologic conditions each monitoring period to attempt to replicate these variables. All data (sea level, groundwater, water quality & creek level) will be compiled and summarized quarterly, building the data set. Daily rainfall along with any severe storm activity will also be summarized. Resilient Florida program is granting \$ 217,100 for this project.

King Street Ownership Transfer

The Florida Department of Transportation (FDOT) transfers the ownership of right-of-way for King Street, Cathedral Place, Cordova Street and the San Sebastian Bridge located between US 1 and Avenida Menendez to the City of St. Augustine (CoSA). It is in the best interest of the CoSA to control this entry corridor bisecting the City to enact mobility improvements consistent with the CoSA's Mobility Plan. Ownership of the bridge will be transferred to CoSA once the reconstruction is complete. The FDOT commits to a redesign of the intersections located at the western base of the Bridge of Lions including Cathedral Place/Avenida Menendez and King Street/Avenida Menendez. The FDOT also commits to evaluating and if feasible work with the City to design, permit and construct a pedestrian/bicycle bridge crossing US 1 connecting east King Street to west King Street. FDOT is providing up to \$18.0 million in reimbursement for this project.

Lake Maria Sanchez Flood Mitigation & Drainage Improvements

This project will benefit approximately 200 acres of the historic district of the Nation's Oldest City. It will provide an increased level of flood protection from increasing high tide events, storm surge and future sea level rise by incorporating a combination of resilience strategies which include upgrades to the existing stormwater infrastructure, installation of a stormwater pump station, construction of a flood wall, and installation of tide check valves. The project area includes several historic buildings and structures listed on the National Register of Historical Places. By maintaining the integrity of the Nations Oldest City through implementation of this project, it will help our regionally significant historical and cultural assets benefiting the County and arguably the Northeast Florida region. FEMA Hazard Mitigation program is granting \$ 8.6 million and Resilient Florida program is granting \$18.8 million for this project.

Lift Station 8, 14, and 41 Replacement

These projects will replace existing city lift stations located throughout the city. Lift station 8 and 14 are circa 1960's "can" stations utilizing a wet and dry pit. LS-41 is an existing suction-lift wastewater pumping station. The new stations will be modern submersible duplex stations with an emphasis on resiliency and hardening against storm surge and flooding.

Lighthouse Park Gravity Sewer Improvements

This project will bring gravity sewer collection systems to the greater Lighthouse Park Neighborhood area. This neighborhood area was identified in the Septic Tank Vulnerability Assessment study as one of the top contributors to surface water nitrogen from septic within the city limits. This project will eliminate existing and future onsite septic systems and residential grinder pump connections to force main. The project area is east of Anastasia Blvd between Ocean Way to the north and Anastasia Park Dr to the south. Design for this project is funded by city bond proceeds.

Mini Grant Program for Sewer Connections in West Augustine – Package 5

This program connects west Augustine area existing homes on septic to the city's existing gravity sanitary sewer collection system. The city has been setting aside \$250,000 per year to be used for these septic to sewer conversions. The city identifies qualifying homes (homes on septic with gravity sewer available) and assembles construction packages. During construction, the existing septic tank is demolished, the home's plumbing is rerouted and connected to the existing gravity sanitary sewer main. Package 5 is converting 11 homes to gravity sewer and 61 conversions have been completed to date.

Paving Management Program

To repair damage caused to roadways over time and numerous utility cuts due to repairs, it is necessary to fund a paving management program. These paving projects are funded annually by the City.

The objective of this program is to provide pavement treatments (i.e., mill and resurface) to streets that have been affected by utilities repairs, flooding and/or suffered frequent pothole asphalt repairs due to age.

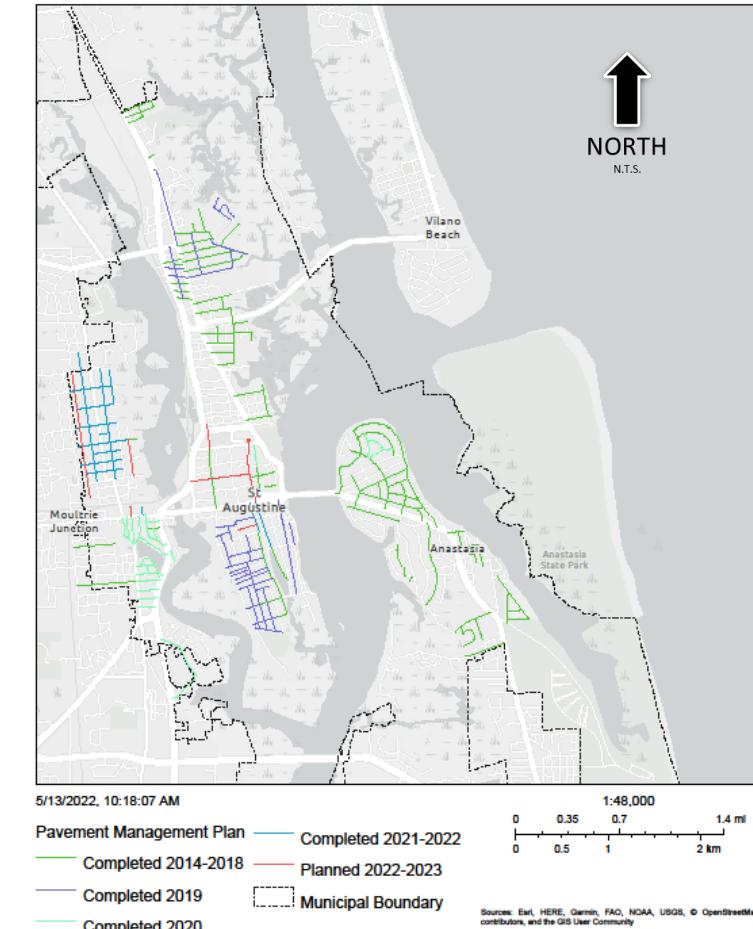

The City is currently performing a pavement condition assessment by RoadBotics.

Proposed FY 2023 Mill and Resurface Paving on the next page.

Pearl Street Gravity Sewer Improvements

The City acquired existing sewer infrastructure that includes a pump station and gravity sewer infrastructure around the perimeter of Webster Elementary School. The City has the opportunity to install gravity sewer main extensions off the existing infrastructure and a watermain replacement to serve the residents in the adjacent area. The project is currently in design and will build out the gravity sewer basin to the full extents possible and serve 42 existing residential homes. The proposed 6-inch watermain will replace the existing 2-inch watermain and tie into existing watermains to continue a loop system. Design and construction of this project is funded by city bond proceeds.

SCADA for Lift Stations, Water and Wastewater Treatment Plants

SCADA (Supervisory Control and Data Acquisition) is used to collect data and monitor the city's lift stations, water treatment plant, and wastewater treatment plant. Currently, the plants and operations are utilizing different systems and technologies of varying age and obsoleteness. This project will identify current issues and immediate fixes, before identifying and implementing a complete permanent solution. The first phase of this project has: identified and documented the current SCADA system and use; produced updated electrical and control panel standard drawings for city use.

South Davis Shores Flood Mitigation & Drainage Improvements

This project will be broken into two phases to include the design, permitting and construction to address the rainfall driven flooding events, with some consideration for tidal surge. This will primarily include major upgrades to the existing undersized and aged drainage infrastructure, reconfiguring a drainage ditch and upsizing an existing culvert. This project would seek to address the rainfall driven flooding through upgrades to existing stormwater infrastructure and installation of smart tide check valves. For the tidal surge, in lieu of the one-way in line tide check valves, a "smart" tide check valve system will be installed into 3 culverts that are tidally influenced. The smart valves will stay in the open configuration to maintain wetland hydrology of upstream wetland systems, but close temporarily in advance of flooding conditions. Florida Resilient program is granting \$ 2.8 M to this project.

South Whitney & West King Street Stormwater Improvements

The proposed improvements consist of raising South Whitney St. and West King St. above the FEMA flood elevation of 7.0' NAVD88, replacing the existing box culvert (40-inch by 56 inch) at South Whitney with a single box culvert (48-inch by 96-inch) that doubles the hydraulic capacity. The project also includes reconstruction of the existing storm sewer system and its outfall at the box culvert on South Whitney St., but close temporarily in advance of flooding conditions. FEMA Hazard Mitigation program is granting \$463,198 and Resilient Florida program is granting \$ 1.2 million to this project.

St. Francis Street Utility Improvements

St. Francis Street currently has a vitrified clay pipe (VCP) gravity sewer collection system that is oversized, shallow-sloped, with cementitious material in the invert of the mains. Sanitary sewer overflows and a collapsed main during trenchless repair qualifies for complete replacement. Project will consist of cast iron water main replacement, gravity sewer replacement, roadway (asphalt or brick) replacement, and stormwater improvements. Adjusting the grade and slope of the gravity sewer main will allow city to continue these hydraulic improvements along Cordova Street with the LMS project.

Stormwater Master Plan – Phase 2

With the last stormwater master plan's data being from 2013, several flood events have taken place due to hurricanes, king tides and heavy rainfall. This proposed City-wide study will update the master plan to incorporate recent vulnerability assessments, resilience studies and a comprehensive plan update to better assess the increase in risk from coastal and rainfall driven flooding. This update will fill in data gaps from the previous coastal vulnerability assessment. The master plan will include an updated comprehensive analysis and risk assessment of critical infrastructure for coastal rainfall and compound flooding; needed stormwater ordinance and development code modifications; prioritization of areas needing stormwater improvements for flooding/water quality; benefit and cost analysis for flooding/water quality improvement projects; a public outreach and education; evaluation of funding options; and development of capital improvement projects to vulnerable areas. American Rescue and Recover Act is providing \$2.0 million funding to this project.

Stormwater Outfall Tide Check-Valve Master Plan

The City has approximately 103 stormwater outfalls that are tidally influenced, resulting in nuisance flooding of the road infrastructure. To date, the City has retrofitted 43 outfalls with tide check valves to eliminate nuisance tidal flooding. The City proposes to retrofit an additional 20 outfalls. Once the locations are identified, the City will contract out (using an existing competitively procured contract) for the evaluation of each storm outfall that includes cleaning and closed-circuit television (CCTV). The City will review that evaluation data and determine if any storm pipe repairs or lining needs to occur in preparation for the tide check valve installation. Resilient Florida program is granting \$230,641 for this project.

Wastewater Treatment Plant Headworks Rehabilitation

The Wastewater Treatment Plant (WWTP) is the initial stage of the sanitary sewage treatment process. The headworks screens out trash, rags, and grit before it enters the treatment process, enhancing efficiency of the water treatment process. The headworks is the original 1987 structure. Rehabilitation will consist of replacing the mechanical screen, grit system, control panels, electrical lightning protection and structural concrete improvements. The project will also elevate critical equipment to 12 feet elevation to ensure operational integrity of the headworks in the event of a Category 2 storm surge event. Construction for this project is funded by city bond proceeds.

Water Treatment Plant Concentrate Outfall

This project will construct a permitted outfall pipe for the Water Treatment Plant's (WTP) low-pressure reverse osmosis (LPRO) concentrate. During production of the city's drinking water, the LPRO system produces approximately 300,000 gallons of brine concentrate per day. The brine is currently discharged to the City's sanitary sewer collection system and pumped to the wastewater treatment plant (WWTP). This concentrate outfall will eliminate 300,000 gallons per day of brine sent through the city's gravity sewers, lift stations, and WWTP. Construction of this project is funded by city bond proceeds.

Water Treatment Plant High Service Pump Motor Control Center and Emergency Generator Replacement

The Water Treatment Plant's (WTP) High Service Pump (HSP) Motor Control Center (MCC) is a critical component of delivering potable water to the distribution system. The existing MCC has reached end of life and does not provide fail safe distribution of potable water in the event of a power outage or surge. This project will completely replace the existing MCC and will be housed inside a climate-controlled environment. Variable frequency drives, programmable logic controllers, and human machine interfaces and control panels with annunciators, alarms, cable, and conduit will be installed. Additionally, a new emergency generator will be installed with an automatic transfer switch. Construction of this project is funded by city bond proceeds.

Water Treatment Plant Optimization

The City has been in a pilot program to test free chlorine for maintaining residual water distribution system instead of the historically used chloramine. FDEP approved the pilot program and has extended it. Data collected during the pilot program showed promising results with respect to residual chlorine at the end of pipeline while maintaining compliance with disinfection byproduct limits. The City wants to evaluate current operational strategies including those in use prior to the free chlorine pilot program. In addition, the City wishes to develop an Operating Plan moving forward that includes the use of free chlorine disinfection, and to enhance the operating staff's capabilities to understand the operating plan and adjust the plan in response to changing conditions.

West Augustine Wastewater Master Plan and Hydraulic Model Update

A Wastewater Master Plan for the West Augustine area is being developed because many of the area residences and businesses are served by on-site septic systems. The primary goal of the Master Plan will be to provide a guide for a planned wastewater collection system that may be constructed in phases with associated costs that can support requests for funding from various loan or grant agencies. The ultimate goal of providing a City wastewater system to the area will be to improve water quality, community health and quality of life.
